

# Lucas Rollan

Senior Front-end Software Engineer

 lucasrollan  
 lucas.rollan@gmail.com

Creative, adaptable and determined to deliver products that provide great value, built with quality and keeping users in mind as top priority. Being a reliable problem solver, striving to be a role model, and leading those around me to create an energetic and positive team culture is my way of putting people first.

## Experience

### Booking.com

11 months

#### Frontend Engineer

Aug 2019 – Present · Amsterdam, Netherlands

Developing and scaling a client-facing messaging product that is dramatically improving customer service by simplifying and unifying communication channels. The project is built with React and undergoing migration to a micro-frontends architecture.

Created self-service flows that helped manage the sudden increase in volume of customer requests amidst COVID-19 crisis.

### Medallia

4 years

#### Senior Front End Software Engineer

Nov 2017 – Jul 2019 · Argentina

Leading an engineering team in the transformation of an existing product into an extensible platform built with React and Redux that will allow the company to further scale and create innovative products.

Onboarded a new engineering team comprised of six new members, leading the team in the take-over of a mission critical project built in Angular, migrating it to React while giving a new direction to the product.

#### Front End Software Engineer

May 2015 – Oct 2017 · Argentina

Successfully developed a top quality UI component library built in React that served as a base to develop a critical product platform with consistency and efficiency.

Implemented and delivered a modern self-service SaaS platform with React and Redux that proved crucial for enabling the company and product to scale.

## Globant

2.5 years

### Web UI Developer

Feb 2013 – May 2015 · Argentina

As staff augmentation engineer for one of the biggest US airlines, some of my contributions include developing a modern e-commerce site as part of a mayor rebranding, and building a renovated user-facing account management interface.

Received Servant's Heart Award as recognition from my peers for team work and collaboration.

## Education
